

RECTANGULAR SILOS

Our silos have the purpose to store roasted coffee beans, and are the most advised for establishment type Coffee-Shops, big markets, baker's, cake shop, etc... specially for coffee, they maintain all the aroma and freshness inside it.

Manufactured in stainless steel material AISI 304L homologated for alimentary use, its internal side is the whole area polished. In the external side it's applied a glossy black paint treatment combined with some details in gold color.

Combining functionality with an elegant and old design line that provides with a distinguished touch to the customer's establishment. The silos provide a support on its back to hold them to the wall.
